S.N. 09/993,401

Art Unit: 1745

December 2, 2003

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12, 18-28, drawn to an apparatus for controlling the temperature and humidity of a gas stream, classified in class 261, subclass 138.
 - II. Claims 13-17, drawn to a method for humidifying a reactant gas stream for use in a fuel cell, classified in class 429, subclass 24.
2. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process (MPEP § 806.05(e)). In this case the method can be used to operate three distinct apparatus, i.e., claims 1-12, 18, 19-28, respectively, as admitted by the Applicant.
3. If invention I is elected, an election of species is required. This application contains claims directed to the following patentably distinct species of the claimed invention:
 - I-1, Claims 1-12 are drawn to an apparatus comprising an evaporator, one or more ports for the delivery of water vapor and the return of condensate and a gas humidifying chamber.

I-2, Claim 18 is drawn to an apparatus comprising an evaporator, a gas humidifying chamber and heaters.

I-3, Claims 19-28 are drawn to an apparatus comprising an evaporator and a gas humidifying chamber.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims is generic.

4. Applicant is advised that a reply to this requirement must include an identification of the invention/species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to

be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dah-Wei D. Yuan whose telephone number is (703) 308-0766. The examiner can normally be reached on Monday-Friday (8:00-5:00).
